

***Emulsion Polymers Consulting and Education, LLC***  
is pleased to announce our  
**2016 SCHEDULE OF WORKSHOPS**

**Scale-up and Commercial Production of Emulsion Polymers**

March 7-10, 2016

Phoenix, Arizona USA

*This workshop provides industrial engineers and scientists with an intensive, interactive workshop on the production of synthetic latices in pilot and commercial scale reactors.*

**Hybrid Latex Systems – PU, Alkyd and Inorganic/Acrylic Latices**

April 18-20, 2016

Alexandria, VA USA

*This workshop is designed to provide industrial scientists and engineers with an intensive, interactive workshop on the synthesis, characterization, and use of several types of hybrid acrylic latices.*

**Core-Shell Latex Particles – Fundamental Aspects of Morphology Control**

June 6-9, 2016

Durham, NH USA

(on the campus of the University of New Hampshire)

*This intensive workshop deals with the basic factors controlling particle morphology in synthetic latices used for coatings, adhesives, impact modifiers and biomedical applications.*

**Characterization of Synthetic Latex Particles**

Fall 2016

To be determined

*This workshop is designed for both analytical chemists who provide characterization data and the engineers and chemists who make the latex. The focus is on measuring the chemical, physical, colloidal and morphological properties of the latex.*
