

Emulsion Polymers Consulting and Education, LLC
is pleased to announce our
2017 SCHEDULE OF WORKSHOPS

Scale-up and Commercial Production of Emulsion Polymers

March 20-23, 2017

San Francisco, California USA

This workshop provides industrial engineers and scientists with an intensive, interactive workshop on the production of synthetic latices in pilot and commercial scale reactors.

Hybrid Latex Systems – PU, Alkyd and Inorganic/Acrylic Latices

April 24-26, 2017

Alexandria, Virginia USA

This workshop is designed to provide industrial scientists and engineers with an intensive, interactive workshop on the synthesis, characterization, and use of several types of hybrid acrylic latices.

Core-Shell Latex Particles – Fundamental Aspects of Morphology Control

June 5-8, 2017

Durham, New Hampshire USA

This intensive workshop deals with the basic factors controlling particle morphology in synthetic latices used for coatings, adhesives, impact modifiers and biomedical applications.

**Rheology Fundamentals & Applications for Synthetic Latices and
Associated Coatings Formulations**

October 11-13, 2017

Las Vegas, Nevada USA

This workshop is designed to provide scientists and engineers with an intensive, interactive workshop on the rheological characteristics of synthetic latices and formulated water based coatings of latex particles

Characterization of Synthetic Latex Particles

November 13-15, 2017

Orlando, Florida USA

This workshop is designed for both analytical chemists who provide characterization data and the engineers and chemists who make the latex. The focus is on measuring the chemical, physical, colloidal and morphological properties of the latex.

EPCEd: the wisdom of experience, the power of knowledge
