

Emulsion Polymers Consulting and Education, LLC
is pleased to announce our
2018 SCHEDULE OF WORKSHOPS

Scale-up and Commercial Production of Emulsion Polymers

March 19-22, 2018
Tampa, Florida

This workshop provides industrial engineers and scientists with an intensive, interactive workshop on the production of synthetic latices in pilot and commercial scale reactors.

Hybrid Latex Systems – PU, Alkyd and Inorganic/Acrylic Latices

April 23-25, 2018
Savannah, Georgia

This workshop is designed to provide industrial scientists and engineers with an intensive, interactive workshop on the synthesis, characterization, and use of several types of hybrid acrylic latices.

Core-Shell Latex Particles – Fundamental Aspects of Morphology Control

June 4-7, 2018
Durham, New Hampshire

This intensive workshop deals with the basic factors controlling particle morphology in synthetic latices used for coatings, adhesives, impact modifiers and biomedical applications.

Characterization of Synthetic Latex Particles

October 1-3, 2018
Denver, Colorado

This workshop is designed for both analytical chemists who provide characterization data and the engineers and chemists who make the latex. The focus is on measuring the chemical, physical, colloidal and morphological properties of the latex.

For information about or to register for any of these workshops,
