

***Emulsion Polymers Consulting and Education, LLC***  
is pleased to announce our  
**2019 SCHEDULE OF WORKSHOPS**

**Scale-up and Commercial Production of Emulsion Polymers**

March 19-22, 2019  
San Diego, California

*This workshop provides industrial engineers and scientists with an intensive, interactive workshop on the production of synthetic latexes in pilot and commercial scale reactors.*

**Hybrid Latex Systems – PU, Alkyd and Inorganic/Acrylic Latexes**

April 15-17, 2019  
Savannah, Georgia

*This workshop is designed to provide industrial scientists and engineers with an intensive, interactive workshop on the synthesis, characterization, and use of several types of hybrid acrylic latexes.*

**Core-Shell Latex Particles – Fundamental Aspects of Morphology Control**

May 6-9, 2019  
Durham, New Hampshire  
(please note that this workshop is scheduled for May in 2019, rather than our usual June date)

*This intensive workshop deals with the basic factors controlling particle morphology in synthetic latexes used for coatings, adhesives, impact modifiers and biomedical applications.*

**Rheology Fundamentals & Applications for Synthetic Latexes and Associated Coatings Formulations**

October 2-4, 2019  
Chicago, Illinois

*This workshop is designed to provide scientists and engineers with an intensive, interactive workshop on the rheological characteristics of synthetic latexes and formulated water based coatings of latex particles.*

For information about or to register for any of these workshops,
