

Emulsion Polymers Consulting and Education, LLC
is pleased to announce our
2020 SCHEDULE OF WORKSHOPS

Scale-up and Commercial Production of Emulsion Polymers

April 20-23, 2020
Atlanta, Georgia

This workshop provides industrial engineers and scientists with an intensive, interactive workshop on the production of synthetic latexes in pilot and commercial scale reactors.

Hybrid Latex Systems – PU, Alkyd and Inorganic/Acrylic Latexes

May 18-20, 2020
Portland, ME

This workshop is designed to provide industrial scientists and engineers with an intensive, interactive workshop on the synthesis, characterization, and use of several types of hybrid acrylic latexes.

Characterization of Latex Particles

October 26-28, 2020
San Diego, California

This workshop is designed for both analytical chemists who provide characterization data and the engineers and chemists who make the latex. The focus is on measuring the chemical, physical, colloidal and morphological properties of the latex.

For information about or to register for any of these workshops,
please contact us at info@epced.com or visit our website at www.epced.com

EPCEd: the wisdom of experience, the power of knowledge
